

FMPro™ Roofing Section Roof/Recommendation Report

ACTON, Mass (April 2022) Digital Facilities Corporation (DFC) has released a set of program updates for FMPro™ a specialized Building Envelope Management solution for comprehensive asset management of Roofing, Façade, Paving and Vertical transportation equipment.

FM-Pro™ is suited for building owners, asset area consultants and building service providers. This easy to deploy SaaS solution is ideal for maintaining annual observation reports, facility and building envelope assessments.

The latest release adds new filters to improve the roof recommendation report output by allowing users to drill into detailed roofing data prior to exporting to excel or printing to a PDF. Users can easily select a roof section, find new filters for selection of roofing and statuses prior to printing. The results can be sorted in descending or ascending order. This new feature provides another specialized report option for users to focus on priority roofing areas and minimize report preparation time.

For a complete release bulletin and instructions on the new options for the roof section recommendation report users can go to program features for the complete release bulletin.
