

RoofPro™ Series – Data Analysis Service

(Data Services for RoofPro™ 4.3 series users)

ACTON, Mass (May 2014) Digital Facilities Corporation (DFC) the industry's leading supplier of Roof Management Solutions, is offering data analysis for users with for RoofPro™ series programs.

RoofPro™ programs are designed for comprehensive roof management with detailed asset tracking not offered in standard roofing apps and roofing service programs.

The data analysis service provides the preferred grouping of comprehensive roofing information to meet the needs of building owners and professional service providers. Grouping data allows statistical reporting that is ideal for decisions for choosing your preferred roofing system, and system supplier.

“Our mission is to provide actionable data that provides users with large roofing inventories comparative data to make capital allocation decisions. RoofPro™ is ideally designed for this mission with extensive data fields for as built information, roofing type classifications, defect and warranty tracking”. Our IT service group has been working in this area for several years and providing a statistical reporting service is a natural evolution –said Steven F. James, president of DFC.”

The data analysis service is a customized statistical project available to license holders with current technical support. For a detailed description of this service users can contact the sales office.
